The Mini Freestanding Pellet Stove
by Enviro

The Mini - Enviro's Freestanding Pellet Stove

The Mini Specifications

Area heated*	600 to 1200 sq. ft.
Efficiency*	80%
BTU/H input max	30,000
BTU/H input min	12,000
Weight (with fuel)	250 lbs.
Hopper Capacity **	48 lbs. /21.5 kg.
Power max***	200 w.

Exclusive Features:

- Automatic controls
- "Run Quiet" system
- Large viewing area (130 sq. in.)
- Large ash pan
- Comes with bolt-on hearth pad
- Comes standard with ignitor
- Dual-mode thermostat ready
- Large heat exchanger
- Levelling legs
- 130 cfm variable speed fan
- Optional outside combustion blower kit
- Optional stainless steel sides

Dimensions:

A	15 1/2" (39 cm)
B	18" (45 cm)
C	35" (89 cm)
D	19" (48 cm)
E	19 1/2" (49 1/2 cm)

You won't believe the heat from this small but powerful pellet stove. With a modern European design, the Mini is clean, efficient, and can fit almost anywhere!

Design -

By making the Mini tall we are able to keep a large hopper capacity even though the stove is only 18" wide and 19 1/2" deep. The clean lines and large glass area help to show the beauty of the fire.

Performance -

At 30,000 BTU's and a fantastic heavy-duty heat exchanger, this little stove can pump out the heat. The large glass gives plenty of radiant heat and the heat exchanger gives abundant convected heat.

The "Run Quiet" System:

The Mini is currently one of the most quiet pellet stoves available in the world, designed to operate with our "Run Quiet" system.

- The auger is cushioned to reduce motor noise.
- The stove can operate efficiently with or without the convection fan running.
- The combustion fan is strategically positioned inside the stove to minimize its noise level. However, our engineers have also made it possible for you to install the combustion fan outside your home to further help suppress noise. All you should hear is the pellet fuel gently dropping into the burnpot.

- The Enviro Mini -
Small Size, Efficient Heat

Clearances to Combustibles

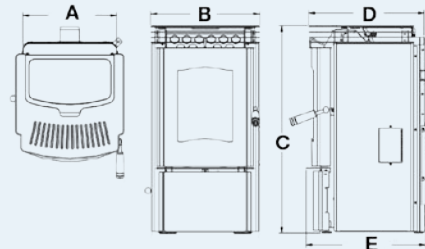

Combustible to back	4" (10cm)
Combustible to sides	8" (20cm)
Combustible to corner	3" (7.5cm)
Top to combustible	14" (35cm)

Please see owner's manual for more information.
