

Instructions for FPL-17C & FPL-24C

These Ceramic Fiber Logs are specifically designed for outdoor use.

General Instructions

We recommend that our products be installed and serviced by professionals who are certified in the U.S. by NFI (National Fireplace Institute) or in Canada by WETT (Wood Energy Technical Training). Installer must follow all instructions carefully to ensure proper performance and safety.

Installer: Please leave these instructions with consumer.

Consumer: Please retain these instructions for future use.

Placement:

1. Place 2 semi circular logs on lava rocks and space evenly. These can be spread out to achieve a larger set if desired.

2. Place large log over gap in the semi circular logs

3. Arrange large burnt end log over the other gap in semi circular logs and rest burnt end on large log.

4. Place small burnt end log on semi circular log and rest burnt end on large burnt end log.

5. Place small log on other semi circular log and rest other end on large burnt end log.

You may arrange the top logs in any way you prefer. The above is only a recommendation.

Note: Please allow logs to dry thoroughly before igniting Fire Pit. This may cause the logs to crack.
