

COBALT SMART-HEAT™
ELECTRIC HEATER
BY BROMIC

INSTALLATION, INSTRUCTION AND
SERVICE MANUAL

SUITABLE FOR ELECTRIC HEATER MODELS:
COBALT 2000W, COBALT 3000W, COBALT 4000W AND COBALT 6000W

IMPORTANT

READ THIS MANUAL CAREFULLY.
SEE INSIDE COVER FOR IMPORTANT
INFORMATION ABOUT THIS MANUAL.KEEP
INSTRUCTION WITH APPLIANCE FOR FUTURE
REFERENCE.

This manual contains important information about the installation, operation, and maintenance of Cobalt Smart-Heat™ Electric Heaters. Please pay close attention to the important safety information shown throughout this instruction manual. Any safety information will be accompanied by the following safety alert symbols:

⚠ DANGER, ⚠ WARNING, ⚠ IMPORTANT

- READ THIS MANUAL CAREFULLY before installing or servicing this product.
- Improper installation, operation, or maintenance can result in death, severe injury, or property damage.
- This appliance is intended for fixed installation with 220-240Volt power supply.
- Installation MUST be carried out by a licensed and authorised technician in accordance with local electrical codes.
- **WARNING: This heater is not equipped with a device to control the room temperature. Do not use this heater in small rooms when they are occupied by persons not capable of leaving the room on their own, unless constant supervision is provided.**
- Patent Pending & Australian Registered Design 338721

Correct Disposal of this product

This marking indicates that this product should not be disposed with other household wastes throughout the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.

IMPORTANT NOTES AND WARNINGS

WARNING

- Read all instructions before installing or using this heater
- Use this heater only as described in this manual. Any other use not recommended by the manufacturer may cause fire, electric shock, or injury to persons.
- Improper installation, adjustment, or alteration and failure to follow the warnings and instructions in this manual could result in severe personal injury, death or property damage.
- The manufacturer is not responsible for any damage that could happen from improper use. The manufacturer emphasises that this appliance should be used in a responsible manner and that all procedures, warnings, and safety instructions contained in this booklet be followed strictly.
- This heater is not intended for use in bathrooms, laundry areas and similar indoor locations. Never locate heater where it may fall into a bathtub or other water container.
- Do not install the heater directly near a bathtub, shower or swimming pool. Any switches or controls must not be within reach of a person in the bathtub, shower or swimming pool.
- **This heater is hot when in use. To avoid burns do not let bare skin touch hot surfaces. Keep combustible materials such as furniture, pillows, bedding, papers, clothes, etc. and curtains at least 1 metre from the front the front of the heater and keep them away from the sides and rear.**
- Extreme caution is necessary when any heater is used by or near children or invalids and whenever the heater is left operating and unattended.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.
- Keep packaging materials out of reach of children
- **Children and adults should be alerted to the hazards of high surface temperatures and should stay away to avoid burns, clothing ignition, or other serious personal injury**
- **Children should be carefully supervised when they are in the area of the heater.**
- Do not attempt to alter the unit in any manner.
- Do not paint any surface of the heater.
- Do not touch the heater with wet hands at any time.
- Do not insert or allow foreign objects to enter front cover or front opening as this may cause an electric shock or fire, or damage the heater
- Do not touch the heating surface at any time, even when the heater is turned off and has cooled down.
- Do not use or store flammable materials near this appliance
- Do not spray aerosols or flammable materials in the vicinity of this appliance while it is in operation
- Never operate the heater in an explosive environment such as areas where petrol or other flammable liquids or vapours are stored.
- Clothing or other flammable materials should not be hung from the heater or placed on or near the heater.

INSTALLATION

- **IMPORTANT** - Installation must be carried out by a licensed and authorised person.
- The installer is to ensure that the requirements of the local authority, local electrical installation code, municipal building codes, and any other relevant statutory regulations are carried out.
- After unpacking, make sure the appliance shows no signs of visible damage or tampering. If the appliance appears damaged, contact the place of purchase for assistance.
- Remove transit protection before use.
- This appliance must only be used on a 220-240 Volt AC Single Phase electricity supply
- This radiant heater is NOT intended to be installed on recreational vehicles and/or boats.
- Do not run cord under carpeting. Do not cover with throw rugs, runners or the like arrange cord away from traffic area and where it will not be tripped over
- A heater has hot and arcing or sparking parts inside. Do not use it in areas where gasoline, paint or flammable liquids are used or stored.
- To maintain Ingress Protection Rating (IPX4), only IPX4 rated conduit fittings should be used for electrical installation.
- **Warning –To Reduce the risk of fire with Danger –To Avoid Fire**
- This warning tag shall be permanently affixed to the power supply cord, no more than 152mm from the attachment plug and the permanence of the warning tag shall be determined in accordance with Test for Permanence of Cord Tag Section:53
- This Installation, Operation and Service manual should not be removed from the site of installation. Installer should leave manual with the customer for future reference.
- Any guard or other protective device removed for servicing (conducted by an authorised person) must be replaced before operating the heater.
- Heaters are not intended to be installed in wardrobes.
- **The appliance must not be located directly below or in front of a wall electricity socket. This is because the heat radiated from the appliance may damage the electricity outlet or plug.**
- If the appliance has not been used, or will not be used, for a long period of time, disconnect power supply
- **A means for all-pole disconnection of the heater must be incorporated in the fixed wiring according to the local electrical codes.**
- Do not mount the heater vertically. Install Heater so that the infrared elements are horizontal. Failure to do this may cause the heating element within the tube to sag and cause premature burnout. Installing vertically will void the manufacturer's warranty.

CLEARANCE

- Do not place articles on or against this appliance
- A minimum safety distance of 39.4" should always be left in front of the appliance.
- **This unit must be mounted at a minimum of 1800 mm above the floor.**
- Be sure the heater is not facing the ceiling or flammable or combustible substances/materials.

IMPORTANT NOTES AND WARNINGS CONTINUES ...

MAINTENANCE/ REPAIR

- Installation and repair must be carried out by a qualified & licenced service person only. The heater should be inspected before use and at least annually serviced & inspected by a qualified & licenced service person.
- Do not perform maintenance until heater has been turned off, power disconnected, and heater temperature has cooled to room temperature.
- Check for damage to the appliance regularly. If damage to the appliance is suspected, discontinue use immediately and contact the supplier or qualified person to repair.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- At the end of this product's useful life, it must not be disposed of as domestic waste, but must be taken to a collection

centre for waste electrical and electronic equipment. It is the user's responsibility to dispose of this appliance through the appropriate channels at the end of its useful life. Failure to do so may incur the penalties established by laws governing waste disposal. Proper differential collection, and the subsequent recycling, processing and environmentally compatible disposal of waste equipment avoids unnecessary damage to the environment and possible related health risks, and also promotes recycling of the materials used in the appliance. For further information on waste collection and disposal, contact your local waste disposal service, or the place of purchase

Approval	CE Approved			

*Heating areas are based on protected environment with mounting height of 2400mm. For unprotected and extremely cold and windy environments heating areas can be less. Please contact Bromic Heating for further advice.

PRODUCT FEATURES

- The Cobalt Smart-Heat Electric heaters are designed to provide efficient spot heating for commercial and residential applications.
- Suitable for indoor and outdoor heating applications such as restaurants, cafes, bars and clubs, factories, office spaces, designated smoking areas, public areas, hotels and more.
- The heaters are available in 2000W, 3000W, 4000W and 6000W models to suit a range of environments.
- High temperature corrosion-resistant coating.
- IPX4 water ingress protection rating.
- Soft glow infrared heating element - No harsh glare.
- Wall and ceiling mounting brackets allowing adjustable angle of the heating direction.
- Heater is equipped with spectral reflector for excellent radiant heat output.
- Patent Pending & Australian Registered Design 338721

HEATER INSTALLATION

WARNING

This Heater **MUST** be permanently Installed and hard wired by an authorised/licenced person. Do Not perform maintenance, or carry out installation or assembly procedure while electrical power is switched on.

REMOVE PACKAGING MATERIAL

All packaging material must be removed from heater before installation.

1. Remove warning note from front of heater
2. Remove the wire cover by pulling it out from under the edge of the heater and in between the reflector
3. Remove packing material around heating elements
4. Check element markings at both ends of heater. Ensure marks on heating element are in line with marks on end cap.
5. Attach the wire cover by pushing one side of it in between the reflector and under the edge of the heater. Perform the same process on the other edge of the heater

HEATER INSTALLATION

⚠ WARNING

DO NOT MOUNT THE HEATER VERTICALLY!

Heater **MUST** be installed so that the tube elements are horizontal. Failure to do this will cause the heating element within the tube to sag and cause premature burnout. Installing vertically will void the manufacturers warranty.

⚠ WARNING

DO NOT MOUNT THE HEATER VERTICALLY!

For outdoor installation heater must be mounted with face of heater angled down.

For longest product life & to maintain product appearance mount heater under cover & protect from rain & weather whenever possible.

INSTALLATION CLEARANCES

FOR 2000W & 3000W MODELS

2000W & 3000w models must be installed with the minimum installation clearances shown in below diagrams. 2000W & 3000W models are supplied with short mounting brackets to be used for both ceiling & wall mounting.

INSTALLATION CLEARANCES

FOR 4000W & 6000W MODELS

4000W & 6000W models must be installed with the minimum installation clearances shown in below diagrams. 4000W & 6000W models are supplied with long mounting brackets to be used for both ceiling & wall mounting. Alternatively, short mounting brackets can be used for wall mounting of the 4000W & 6000W models to position the heater closer to the wall. Short mounting brackets must be purchased separately.

CEILING & WALL MOUNTING

1. Mark mounting hole centres on ceiling or wall.

① Mounting Hole Centres & Heater Position

2000W & 4000W Models

3000W & 6000W Models

2. Attach mounting brackets to ceiling or wall using appropriate fasteners (Not supplied).
3. Bring heater up to mounting brackets and lock into position with M5x10 screw & nut.
4. Rotate heater to required angle. Lock into position with self tapping screw.
5. Make electrical connection from heater to power supply.

CHAIN SUSPENSION (SOLD SEPARATELY)

1. Heater must be installed with heater surface 2400mm above the floor level. If required, cut down length of chain to ensure correct installation height.
2. Attach chains to heater with "S" hooks. Crimp "S" hooks closed after assembly.
3. Prepare ceiling structure for heater. Attach chains to ceiling structure & suspend heater.
4. Make electrical connection from heater to power supply. If required fix supply power cord to ceiling chain with cable ties.

TUBE SUSPENSION (SOLD SEPARATELY)

1. Mark mounting hole centres on ceiling. Attach mounting brackets to ceiling using appropriate fasteners (Not supplied).

① Mounting Hole Centres & Heater Position

2. Heater must be installed with heater surface at least 2400mm above the floor level. Supplied suspension tubes position heater surface 39.4" below the ceiling surface. If required, cut down length of suspension tubes to ensure correct installation height. Minimum distance from front surface of heater to ceiling surface must be 9.8" for 2000W & 3000W models & 330mm for 4000W & 6000W models.

3. If suspension tubes are cut down, drill new mounting holes in each tube.

③ Suspension Tube Mounting Hole

4. Make electrical connection in junction box as per electrical installation instructions in this manual.
5. Feed power cord through suspension tube.
6. Assemble suspension tubes to rear bracket with M5 screw, spring washer and nut.
7. Rotate heater to required angle. 15° or 30° in either direction. Lock into position with self tapping screw.
8. Raise heater assembly into position. Attach suspension tubes to ceiling brackets with M5x35mm screws, spring washers & nuts.

9. Make electrical connection from suspension tube power cord to power from ceiling as per electrical installation instructions in this manual.

WARNING

This Heater **MUST** be permanently Installed and hard wired by an authorised/licenced person. Do Not perform maintenance, or carry out installation or assembly procedure while electrical power is switched on.

WARNING

ELECTRICAL SHOCK HAZARD! Serious injury or death may occur. Disconnect from electrical supply before installing or servicing this heater. Read and follow installation clearance requirements outlined in this manual. The Appliance **MUST** be connected to a properly grounded electrical source. Disconnection incorporated in the fixed wiring is to be provided

ELECTRICAL INSTALLATION

1. Check product label for correct voltage and wattage
- Make sure power source conforms to the heaters requirements.
2. Junction box has a Ø22mm hole to suit M20 or PG13.5 cord grip. Install cord grip with minimum rating of IPX4 to maintain the IPX4 rating of the heater. Use cord grip suitable for at least 220°F.
3. For supply connection, use wires suitable for at least 220°F and at least 1.5mm² for 2000W and 3000W models, 2.5mm² for 4000W and 6000W models. The fixed wiring must be positioned away from & protected from the enclosure of the heater.
4. Make electrical connections in accordance with local electrical code regulations. For outdoor installation

all connections must be made in accordance with local electrical code regulations for outdoor wiring. Only use wiring components approved for outdoor use with minimum IPX4 rating. For all models the junction box has one terminal block for the active and neutral connections of the element. The polarity of power supply can be connected to terminal block in either direction. Earth ground wire screw is located in the end of junction box.

5. After installation, the distance between live parts and earth (or earthed metal) should not be less than 2.5 mm. The distance between live and neutral terminal should not be less than 2.0 mm.
6. Assemble the junction box cover & gasket. Ensure that the junction box cover gasket (supplied with unit) is installed to maintain the IPX4 water ingress protection rating of the heater. Failure to install correctly will void the manufacturer's warranty.

SERVICING

WARNING

Servicing and maintenance **MUST** be carried out by an authorised and licensed person only

WARNING

ELECTRICAL SHOCK HAZARD!

Serious injury or death may occur.

Disconnect from electrical supply before servicing this heater.

MAINTENANCE

For longest product life & to maintain product appearance mount heater under cover & protect from rain & weather whenever possible.

The exterior housing of the heater should be cleaned regularly with a soft damp cloth. For locations near the coast, salt in the air can cause rusting of metal. Additional cleaning of the heater with a soft damp cloth fortnightly will increase the life of the products appearance.

Ensure that there is no excessive build-up of dirt/dust on the reflectors or elements as this can cause overheating and premature element failure. To clean the reflectors and elements, ensure heater is off and has been off for at least 2 hours after operation, and wipe off any dirt/dust with a soft & dry cloth.

TUBE ELEMENT REPLACEMENT

1. Remove the wire cover by pulling it out from under the edge of the heater and in between the reflector.
2. Remove 2 screws from both end caps. Remove end caps and wire cover
3. Open first Element Lock Bracket by removing screw.
4. Remove outer Hex Nut, Spring Washer and Lead Wire Ring Terminal from the threaded stud.
5. Repeat steps 3-4 to release second end of element.
6. Remove old Tube Element.
7. Assemble new Tube Element.
Hex Nut, Spring Washer and Ring Terminal must be assembled tightly at both ends of element.
8. Element Lock Brackets and Element End Covers must be replaced at both ends of the heater. Assemble front cover and secure with 3 screws.
9. Attach the wire cover to one end cap by inserting the cover's wires into the end cap's holes. Make sure curve of wire cover is outward. Then assemble this end cap with 2 screws.

TROUBLESHOOTING

SYMPTOM	POSSIBLE CAUSE (S)	CORRECTIVE ACTION
Element does not energize	1. Defective element 2. Improper connection	1. Replace element 2. Check connection to power outlet
Not enough heat	1. Heater too small for application 2. Heater mounted too high or too far	1. Add additional heater(s) 2. Decrease mounting height or distance
Too much heat	1. Heater too large for application 2. Heater mount too low or too close	1. Replace with smaller heater 2. Increase mounting height or distance
Hot spot in Tube	1. Heater is not level 2. Grease or moisture on tube	1. Adjust to level mount 2. Clear tube-replace if problem persists
