Matching substance with style, experience the new age of smart-heating

Innovation meets aesthetics, to bring you a powerful range of heaters that re-defines the world of heating. Patented Platinum Smart-Heat™ provides benefits never before seen in outdoor gas radiant heaters.

Our Gas Range gives you electronically controlled smart-safety; smart wind-resistance; one-switch, on/off smart venue-integration; smart cost-efficiency; wall or ceiling smart-mounting; flexible and directional smart-heating.

PLATINUM SMART-HEAT

Top quality performance and the looks to match

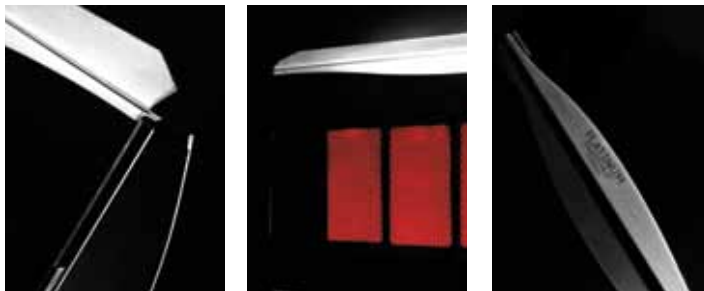

The brushed stainless steel and ceramic medium makes Platinum Smart-Heat™ Gas suitable for the most exclusive outdoor or home environments. By protecting the tiles behind its translucent ceramic medium, effective heat is guaranteed in winds of up to 11mph.

Platinum Smart-Heat™ Gas
300 Series
Available in 300 / 500 Series
LPG / Natural Gas

Able to withstand very high temperature, the tinted ceramic transforms obtrusive red glare emitted by traditional tiles into a soft glow. This enhances the overall experience of warmth, while ensuring even heat distribution.

Smart-safety means that electronic controls allow automatic re-ignition if the heater goes out. The integrated flame safety shut-off turns the heater off if it does not re-ignite.

Bistro Guillaume, Melbourne

Warm and even “comfort” heat is achieved by passing the radiant heat through the tinted ceramic medium. Directional ceiling or wall mounts create true positioning versatility. A dual-layer heat deflector allows for low-clearance installations.

Criniti's Darling Harbour, Sydney

TUNGSTEN

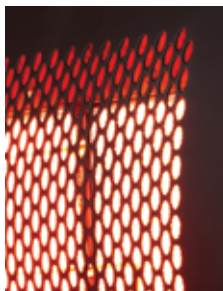

SMART-HEAT

A designed, cost-conscious product range that does not sacrifice aesthetics for function

The patented direct ignition system, never before seen on an outdoor gas radiant heater, ensures a reliable start and effective operation, even in winds of up to 8mph.

Tungsten Smart-Heat™ Gas
300 Series
Available in 300 / 500 Series
LPG / Natural Gas

Stainless steel with high temperature ceramic coating, maximizes long life and durability in tough outdoor environments. A neutral black finish ensures a fit with all decors.

Bavarian Bier Cafe, Brisbane

Tungsten Smart-Heat™ Gas 500 Series

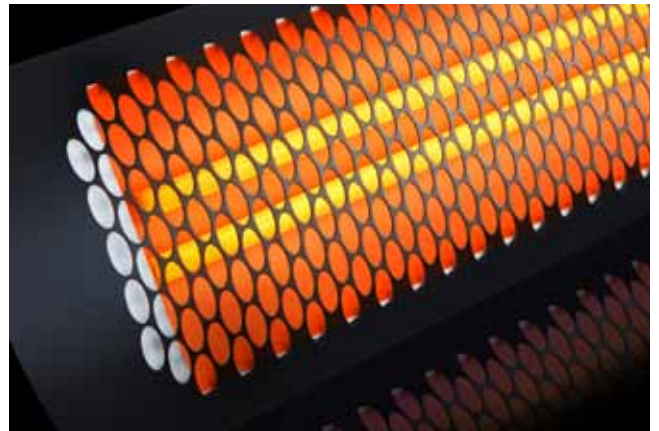

TUNGSTEN

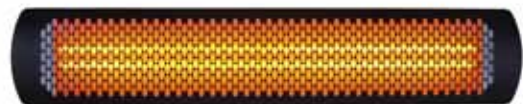

SMART-HEAT

An infrared electric heater blending aesthetics and function

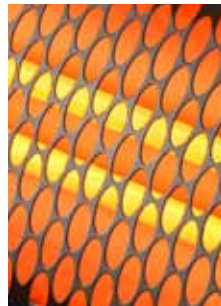

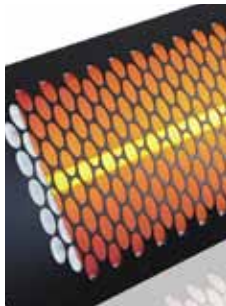

Its stylish design provides efficient directional heating, compatible with smart control systems to enable precise dimming control with its simple one-touch on/off switch

Tungsten Smart-Heat™ Electric
2000W / 4000W

Tungsten Smart-Heat™ Electric
3000W / 6000W

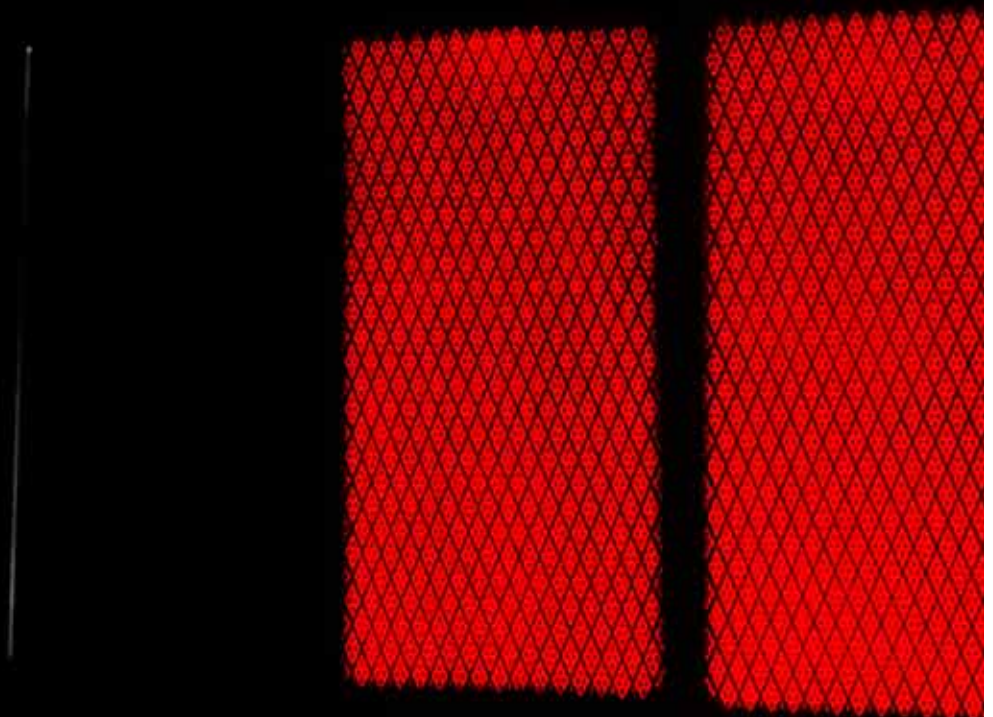

Water / splash resistance, the Tungsten Smart-Heat™ Electric works in almost any weather condition. The swivel bracket allows the heat to be directed in the desired location. It's equipped with a spectral reflector for excellent radiant heat output.

Tungsten Smart-Heat™ Electric like its predecessors is wall and ceiling mountable. It is available in four models of varying heating power, and carries on the legacy of innovation meeting aesthetics.

Re-defines the world
of outdoor heating.
