NOTICE

DO NOT DISCARD THIS MANUAL

- Important operating and maintenance instructions included.
- Read, understand and follow these instructions for safe installation and operation.
- Leave this manual with party responsible for use and operation.

**DO NOT
DISCARD**

Congratulations!

Congratulations on selecting a SimpliFire Electric Fireplace, an elegant and clean alternative to wood & gas burning fireplaces. The SimpliFire electric fireplace you have selected is designed to provide the utmost in safety, reliability, and efficiency.

READ CAREFULLY BEFORE ATTEMPTING TO ASSEMBLE, INSTALL, OPERATE, OR MAINTAIN THIS PRODUCT.

PROTECT YOURSELF AND OTHERS BY OBSERVING ALL SAFETY INFORMATION. FAILURE TO COMPLY WITH INSTRUCTIONS COULD RESULT IN PERSONAL INJURY AND/OR PROPERTY DAMAGE.

⚠ WARNING: To reduce risk of fire, electrical shock, or personal injury, read all instructions before using appliance.

**INSTALLER: DO NOT DISCARD THIS MANUAL -
LEAVE FOR HOMEOWNER - SAVE THESE INSTRUCTIONS**

1 IMPORTANT INSTRUCTIONS

IMPORTANT SAFETY INSTRUCTIONS

WARNING! Risk of Fire! Risk of Burns! Risk of Electrical Shock!

DO NOT:

- Install or operate damaged appliance
- Modify appliance
- Operate the appliance without fully assembling all components

The following actions are strictly prohibited.

- Installation other than as instructed by Hearth & Home Technologies Inc.
- Installation and/or use of any component part not approved by Hearth & Home Technologies Inc.

Hearth & Home Technologies Inc. disclaims any responsibility for, and the warranty and agency listing will be voided by the above actions.

When using electrical appliances, basic precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

- Read all instructions before installing this appliance.
- This appliance is hot when in use. To avoid burns, do not let bare skin touch hot surfaces. Keep combustible materials such as furniture, pillows, bedding, papers, clothes, etc. and curtains at least 3 ft. (0.9 m) from the front of the appliance and keep them away from the sides and rear
- Extreme caution is necessary when any appliance is used by or near children or invalids and whenever the appliance is left operating and unattended.
- Do not operate any appliance if it malfunctions. Disconnect power at service panel and have appliance inspected by a reputable electrician before reusing.
- Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock or fire, or damage the appliance.
- To prevent a possible fire, do not block appliance connection fan air intakes or exhaust in any manner.
- A appliance has hot and arcing or sparking parts inside. Do not use it in areas where gasoline, paint, or flammable vapors or liquids are used or stored.
- Use this appliance only as described in this manual. Any other use not recommended by the manufacturer may cause fire, electric shock, or injury to persons.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions, has been dropped or damaged in any manner. Return appliance to authorized service facility for examination, electrical or mechanical adjustment or repair.
- Do not use outdoors.
- The appliance is not intended for use in bathrooms, laundry areas and similar indoor locations. Never locate appliance where it may fall into a bathtub or water container.
- Do not run cord under carpeting. Do not cover cord with throw rugs, runners, or the like. Arrange cord away from traffic areas and where it will not be tripped over. Do not tightly coil cord.
- Always use properly grounded, fused and polarized outlets.
- Always use ground fault protection where required by electrical code.
- To disconnect appliance, turn controls to "OFF" then remove plug from outlet or turn off circuit.
- Always disconnect power before performing any cleaning, maintenance or relocation of the appliance.
- To prevent a possible fire, do not burn wood or other materials in this appliance.
- To prevent electrical shock or fire, always use a certified electrician should new circuits be required.
- When transporting or storing the appliance, keep in a dry place free from excess vibration and store to avoid damage.
- Avoid use of an extension cord because an extension cord may overheat and cause a fire. However if you have to use an extension cord, the cord should be No. 14 AWG minimum size and rated to not less than 1875 watts.

WARNING! DO NOT operate fireplace before reading and understanding operating instructions. Failure to operate fireplace according to operating instructions could cause fire or injury.

WARNING! Improper installation, adjustment, alteration, service or maintenance can cause injury or property damage. Refer to owner's information manual provided with this appliance. For assistance or additional information consult a qualified installer, service agency or your dealer .

NOTICE! This fireplace is not intended for use as a primary heat source and should not be factored as such in residential heating calculations.

SAVE THESE INSTRUCTIONS

▲ Safety Alert Key:

- **WARNING!** Indicates a hazardous situation which, if not avoided could result in death or serious injury.
- **CAUTION!** Indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

B. Warranty

SimpliFire™ WARRANTY

Hearth & Home Technologies, on behalf of its brand SimpliFire ("SimpliFire"), extends the following warranty for electric fireplaces that were purchased from a SimpliFire authorized dealer.

WARRANTY COVERAGE:

SimpliFire warrants to the original owner of the SimpliFire fireplace, and to any transferee taking ownership of the SimpliFire fireplace within one year following the date of original purchase, that the SimpliFire fireplace will be free from defects in materials and workmanship at the time of manufacture. If a SimpliFire fireplace is found to be defective in materials or workmanship during the applicable warranty period, HHT will, at its option, repair or replace the SimpliFire fireplace. SimpliFire, at its own discretion, may fully discharge all of its obligations under such warranties by replacing the product itself or refunding the verified purchase price of the product itself. The maximum amount recoverable under this warranty is limited to the purchase price of the product. This warranty is subject to conditions, exclusions and limitations as described below.

WARRANTY PERIOD:

Warranty coverage begins on the date of original purchase. In the case of new home construction, warranty coverage begins on the date of first occupancy of the dwelling or six months after the sale of the product by an independent, authorized SimpliFire dealer/ distributor, whichever occurs earlier. The warranty shall commence no later than 24 months following the date of product shipment from HHT, regardless of the installation or occupancy date.

WARRANTY CONDITIONS:

This warranty only covers SimpliFire fireplaces that are purchased through a SimpliFire authorized dealer or distributor. A list of SimpliFire authorized dealers is available on the SimpliFire websites.

WARRANTY EXCLUSIONS:

This warranty does not cover the following:

- Changes in surface finishes as a result of normal use. As a heating appliance, some changes in color of interior and exterior surface finishes may occur. This is not a flaw and is not covered under warranty.
- Damage to printed, plated, or enameled surfaces caused by fingerprints, accidents, misuse, scratches, melted items, or other external sources and residues left on the plated surfaces from the use of abrasive cleaners or polishes.
- Repair or replacement of parts that are subject to normal wear and tear during the warranty period. These parts include: paint, batteries and the discoloration of glass.
- Damages resulting from: (1) failure to install, operate, or maintain the appliance in accordance with the installation instructions, operating instructions, and listing agent identification label furnished with the appliance; (2) shipping or improper handling; (3) improper operation, abuse, misuse, continued operation with damaged, corroded or failed components, accident, or improperly/ incorrectly performed repairs; (4) environmental conditions (5) installation or use of components not supplied with the appliance or any other components not expressly authorized and approved by HHT; (6) modification of the appliance not expressly authorized and approved by HHT in writing; and/or (7) interruptions or fluctuations of electrical power supply to the appliance.
- Our obligation under this warranty does not extend to the SimpliFire fireplace's capability to heat the desired space.

This warranty is void if:

- The fireplace is subject to or operated in atmospheres contaminated by chlorine, fluorine, or other damaging chemicals.
- The fireplace is subjected to or operated in places with prolonged periods of dampness or condensation or weather. Examples include but are not limited to outdoors, porches, and laundry rooms.
- There is any damage to the fireplace or other components due to water or weather damage.

LIMITATIONS OF LIABILITY:

- The owner's exclusive remedy and SimpliFire's sole obligation under this warranty, under any other warranty, express or implied, or in contract, tort or otherwise, shall be limited to replacement, repair, or refund, as specified above. In no event will SimpliFire be liable for any incidental or consequential damages caused by defects in the appliance. Some states do not allow exclusions or limitation of incidental or consequential damages, so these limitations may not apply to you. This warranty gives you specific rights; you may also have other rights, which vary from state to state. EXCEPT TO THE EXTENT PROVIDED BY LAW, SIMPLIFIRE MAKES NO EXPRESS WARRANTIES OTHER THAN THE WARRANTY SPECIFIED HEREIN. THE DURATION OF ANY IMPLIED WARRANTY IS LIMITED TO DURATION OF THE EXPRESSED WARRANTY SPECIFIED ABOVE.

2 GENERAL INFORMATION

A. Appliance Certification

MODELS: SF-BI30-EB, SF-BI36-EB

LABORATORY: CSA International

TYPE: Electric Air-Heaters Fixed and Location-Dedicated
Electric Room Heaters

STANDARD: UL 2021 (3rd Edition) CSA C22.2 No 46-13

NOTICE: This installation must conform with local codes.

NOT INTENDED FOR USE AS A PRIMARY HEAT SOURCE.

This appliance is tested and approved as either supplemental room heat or as a decorative appliance. It should not be factored as primary heat in residential heating calculations.

Note: The device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

→ B. California

WARNING: This product can expose you to Di-(2-ethyl hexyl) phthalate, which is known to the State of California to cause cancer and reproductive harm. For more information go to: www.P65Warnings.ca.gov.

C. Unpacking and Inspecting Appliance

WARNING! DO NOT use this Electric Fireplace if any part has been under water. Immediately call a qualified service technician to inspect and to replace any part of the electrical system if necessary. Keep plastic wrapping away from children.

- Carefully remove the appliance and components from the packaging. Discard packaging.
- Carefully inspect components for any damage.
- Reference parts list to verify all parts have been received.
- Report to your dealer any missing or damaged parts.
- Read all the instructions before starting the installation. Follow these instructions carefully during the installation to ensure maximum safety and benefit.

D. Model and Serial Number Information

The model and serial number information is located on the rating plate. The rating plate is located on the upper wall of the appliance behind glass front.

Homeowner Reference Information

We recommend that you record the following pertinent information about your fireplace.

Model Name: _____ Date purchased/installed: _____

Serial Number: _____ Location on fireplace: _____

Dealership purchased from: _____ Dealer Phone: _____

Notes: _____

3 GETTING STARTED

A. Parts and Hardware

Parts and Hardware List	
Part	Quantity
Fireplace	1
Instruction Manual	1
Remote Control	1
AAA Battery	2
Mounting Bracket	4
Rear Leveling Bracket	2
Screw ST4x8	8
Screw ST4x12	4
Power Cord Assembly (for 120V only)	1
240VAC 4 Wire Conversion Plug	1

B. Tools and Supplies Needed

Before beginning the installation be sure that the following tools and building supplies are available.

Tape measure
Pliers
Hammer
Gloves
Phillips screwdriver
Safety glasses
Flat blade screwdriver
Level
Framing material
Framing square
Electric drill and bits (1/4 in.)
Reciprocating saw

C. Appliance Dimensions

units: inches

MODEL	SHELL SIZE					TRIM SIZE		VIEWING AREA		CHASE SIZE		
	D2	H1	W1	W4	W5	W2	H2	W3	H3	H4	D1	W5
SF-BI30-EB	11	26-3/4	33	24	31	30	26-1/4	28-1/4	22-3/4	28-3/4	11-3/4	31
SF-BI36-EB	11	31-7/32	39	30	37	36	30-1/2	34-1/4	27-1/4	33-7/32	11-3/4	37

D. Location

When choosing a location for your fireplace ensure that the general rules are followed:

- For best results, install out of direct sunlight.
- Power supply service must be installed within proximity of electric fireplace prior to finishing to avoid reconstruction.
- See Figure 3.C for appliance dimensions and to determine location of appliance installation.

E. Clearance to Combustibles

The SimpliFire Built-in Series is a zero clearance design, with the exception of the top of the unit when hard-wired for 240V. Any insulation and vapor barrier should be placed a minimum of 2" from the top of the firebox. Bend the supplied stand-offs to a vertical position to maintain this clearance.

Minimum Clearance to Combustibles

	120V	240V
Sides.....	0 in.....	0 in
Floor.....	0 in.....	0 in
Top.....	0 in.....	2 in
Back.....	0 in.....	0 in
Front.....	36 in.....	36 in
Mantels.....	See Figure 3.1	

WARNING! Risk of Fire! Keep electrical cords, drapery, furnishings or other combustibles at least 3 ft. (0.9 m) from the front of the electric fireplace.

F. Electrical Supply Circuit Requirements

Plan the location of the appliance so that it will have adequate electric power. A 15 AMP, 60Hz circuit is required for both 120V and 240V installations. Additional appliances on the same circuit as this appliance may exceed the current rating of that circuit. A dedicated circuit is not required, but is preferred to prevent circuit breaker trips or fuse failure.

Reference Section 4.F for more complete detail on completing electrical installation.

G. Positioning of Top Stand-offs

When this unit is to be hard-wired for 240V, a clearance of 2 inches is required on the top of the unit. Bend the supplied stand-offs on the top of the unit to a vertical position to maintain this clearance.

Confirm electrical connection switch is properly positioned to reflect 120V or 240V, depending on wiring choice.

Figure 3.1 Minimum Vertical and Maximum Horizontal Dimensions of Combustible Mantels.

4 INSTALLATION

A. Selecting Appliance Location

When selecting a location for the appliance it is important to consider the required clearances to walls (see Figure 4.1).

WARNING! Risk of Fire or Burns! Provide adequate clearance around air openings and for service access. Due to high temperatures, the appliance should be located out of traffic and away from furniture and draperies.

NOTICE: Illustrations reflect typical installations and are FOR DESIGN PURPOSES ONLY. Illustrations/diagrams are not drawn to scale. Actual installation may vary due to individual design preference.

This product can be built into new construction or an existing factory-built fireplace. Reference Sections 4.A - 4.D for specific information for your installation.

MODEL	W1	H1		D1	W2	D2	D3
(Table in Inches)		120V	240V				
SF-BI30-EB	32	29	31	11-5/8	47-5/16	33-1/2	23-11/16
SF-BI36-EB	38	33-11/16	35-11/16	11-5/8	55	38-29/32	27-1/2

ELECTRICAL SPECIFICATIONS:

MODEL	(V)	(W)	REMOTE	(A)
SF-BI30-EB	120/208/240	1400/2100/2800	Yes	11.7/10.1/11.7
SF-BI36-EB	120/208/240	1400/2100/2800	Yes	11.7/10.1/11.7

Figure 4.1 Clearance Requirements

B. Appliance Preparation

Install mounting brackets (4) by aligning them with the pre-drilled holes located on the side of the appliance. Use two screws (ST4 x 8) per bracket to secure to the appliance. See Figure 4.2 and 4.3.

Installing leveling brackets (2) by aligning them to the preset holes at the base of the appliance. Use two screws (ST4 x 8) per bracket to secure the appliance. See Figure 4.2.

Figure 4.2 Pre-drilled Hole Locations

Figure 4.3 Bracket Locations

C. Installation into Existing Fireplace

1. Seal all drafts with non-fibrous insulation materials to prevent debris or water from falling from the chimney to electric fireplace.
2. Close or seal off the chimney flue and close damper (if applicable) to prevent rain infiltration.
3. Do not install in an existing fireplace that is prone to dampness.
4. A provision must be made for the appliance to be connected to power within existing firebox, or on an adjacent wall.

D. Installation into New Construction

Position the fireplace within the opening in the framing. Level the fireplace with shims if necessary. Attach the fireplace to the framing with the two provided brackets and screws or nails.

E. Constructing the Chase

A chase is a vertical box-like structure built to enclose the electrical appliance. Chases should be constructed in the manner of all outside walls of the home to prevent cold air drafting problems. The chase should not break the outside building envelope in any manner.

Walls, ceiling, base plate and cantilever floor of the chase should be insulated. Vapor and air infiltration barriers should be installed in the chase as per regional codes for the rest of the home. Additionally, in regions where cold air infiltration may be an issue, the inside surfaces may be sheetrocked and taped for maximum air tightness.

F. Electrical Connection

Note: All wiring must be completed prior to finishing the unit.

WARNING! Risk of Fire, Electrical Shock, and Injury!
Electrical wiring must comply with local building codes and other applicable regulations.

WARNING! Risk of Shock! *Label all wires prior to disconnection when servicing product. Wiring errors can cause improper and dangerous operation. Verify proper operation after servicing.*

This appliance has been designed to be hard-wired for 120V. A supplied plug-in kit is also available for 120V ONLY.

A 15 AMP, 60 Hz. circuit with a properly grounded outlet is required for both 120V and 240V installations. Use minimum size 14 AWG for supply connection to 120 -240 volt, 60 Hz, 15 AMP branch circuit. Use copper wire only. The supply wiring should be properly grounded. A dedicated circuit is recommended as other appliances on the circuit may cause the breaker to trip or fuse to blow when the appliance is operating.

VOLTAGE SELECTOR SWITCH

This appliance ships standard for a hardwire application. To access terminal block for electrical connection, remove the screws securing the junction box cover plate located on the upper right side of the appliance. A Romex strain relief connector (not provided) is required for proper installation. Slip supply wires through the Romex connector and through hole in the junction box cover plate. Connect supply wires to appliance using terminal block provided. For 120V applications, connect the hot supply wire to the L1 line listed on the terminal block, connect the common supply wire to the N terminal and ground supply wire to the G terminal. For 120V applications the L2 terminal will not have any supply connections.

For 240V applications, connect one hot supply wire to the L1 position and one to the L2 position listed on the terminal block, connect the common supply wire to the N terminal and ground supply wire to the G terminal. Ensure all connections are tight and there are no exposed wires. Tighten Romex strain relief and reattach junction box cover plate. Inspect that the correct voltage is selected on the selector switch located behind the glass on the ceiling of the unit. Failure to do so could damage the product.

To attach supplied plug-in kit for 120V applications, follow the steps below:

1. Remove the screws securing the junction box cover plate on the upper right side of appliance.
2. Gently pull cover plate away from unit and unplug white connector.
3. Attach the white connector on the supplied plug-in kit.
4. Inspect all wire connections for any exposed wires.
5. Secure junction box cover plate.
6. Confirm the selector switch located behind the glass on the ceiling of the unit is set to 120V.

G. Finishing Fireplace Wall

Non-combustible materials may be used to finish up to the fireplace glass frame. Ensure that you leave adequate room to remove and replace the glass frame. See Figure 4.4.

Figure 4.4 Finishing Dimensions

5 OPERATING INSTRUCTIONS

WARNING! Do not operate the unit if it is damaged or has malfunctioned. If you suspect the unit is damaged, call a qualified service technician to inspect and replace any part of the electrical system if necessary.

Note: A harmless slight brief odor may occur during first use or after prolonged period of storage.

A. Manual Switch Function:

The appliance can be operated by both remote control and manual button. Once the unit has been properly connected to a grounded electrical circuit, the unit can be turned ON by pressing the Flame button. In any active Flame mode, the Heater button function is available. If the Flame effect is OFF, there is no Heater button function. See Figure 5.1.

Flame Button

By pressing the FLAME button, the unit will cycle through four flame effects.

Heater Button

- Press the heater button to turn on heater. Appliance will beep and illuminate 2 red LEDs.
- Press second time turns heater off.

NOTE:

There is a brief delay between the heater command and the heating turning ON. When the appliance receives a heater ON command, the appliance blower will turn ON for 8 seconds before the heater turns ON. There is also an 8 second delay between heater off and blower shutdown.

B. Operating by Remote Control

- Make sure batteries are properly installed in Remote Control.
 - Battery requirements 2 x AAA batteries (included)
- The effective range of the remote is up to 13 ft.
- The remote control must be within the 13 ft. range and also be pointed directly at the face of the appliance. For best results, position the remote control within 45 degrees of the face of the appliance

C. Resetting Temperature Cutoff Switch

The heater is protected with a safety device to prevent overheating. Should the heater overheat, an automatic cutoff will turn the heater OFF. It will not turn ON automatically without being reset. If it overheats for any reason, it can be reset by:

1. Turn appliance to off
2. Unplug unit and wait 5 minutes
3. Plug in and turn on.
4. If hard-wired, turn off circuit.

CAUTION: If appliance overheats repeatedly, discontinue use and call customer / technical support.

CAUTION: If you need to continuously reset the heater, unplug the appliance and call your customer/technical support.

	ICON	TITLE	FUNCTION	REMOTE LCD DISPLAY	FIREPLACE RESPONSE
		POWER	The POWER button will turn the fireplace on. It will also put the fireplace in a standby mode. This will turn off all functions at once but will hold the settings in memory except Heater function. The unit will turn on at the same settings by pressing the power button again.	LCD illuminates and displays flame status icon and temperature set point.	Fireplace emits single audible beep to confirm command to transition to ON or STANDBY state
		FLAME	By pressing the FLAME button, the unit will cycle through four flame effects.	LCD illuminates and displays flame status icon.	Fireplace emits single audible beep to confirm command to transition between four FLAME states.
		HEATER	Press Heater button once heater turns on. Press Heater button twice turns off heater.	LCD illuminates and displays heater status icon.	Fireplace emits signal audible beep to confirm command to transition between ON and OFF. Fireplace displays two red LEDs for 8 seconds to confirm command.
	 	THERMOSTAT	Pressing the Temperature button adjusts the heater's response to the ambient temperature conditions in the room. Temperature adjusts from 16 °C - 28 °C (61 °F - 82 °F). Power button must be on to set from °C to °F. Hold for 3 seconds and the LCD display from °C to °F.	Remote displays the temperature. If in Stand-by mode, temperature displays but cannot be adjusted.	Fireplace emits single audible beep to confirm command to change desired temperature set point.
		TIMER	Pressing the Timer button sets the time desired for the fireplace to run. The Timer can be set from .5 hour up to 9 hours in 1 hour increments.	Remote will display the time setting selected. If no timer is set, there will be no indicator.	Fireplace will emit single audible beep to confirm command to desired timer setting.

6 MAINTENANCE

A. Maintenance

WARNING! Risk of Shock! Always unplug the cord before moving or servicing. Do not immerse appliance in water.

- Always turn OFF the appliance and disconnect the cord from the electrical outlet before cleaning your appliance.
- Light accumulated dust may be removed from the appliance with a soft cloth or vacuum cleaner.
- Wipe the exterior surfaces of the appliance occasionally with a slightly damp cloth using a solution of mild detergent and water. Dry thoroughly before operating the appliance.

CAUTION! Do not allow water to run into the interior of the appliance as this could create a fire or electric shock. Always disconnect electrical service before servicing appliance.

- The fan motor is factory lubricated for life and will not require further lubrication.
- Store appliance in a clean dry place when not in use.

WARNING! Risk of Fire! To reduce risk of fire, do not store or use gasoline or any other flammable vapors or liquids in the vicinity of the appliance.

WARNING! Risk of Electrical Shock! Any other servicing needed must be performed by an authorized service representative. Do not attempt to service the unit yourself.

B. Cleaning

Cleaning Glass

Dust particles can be removed by buffing lightly with a clean dry cloth. Fingerprints and other marks can be cleaned with a cloth dampened with a quality household glass cleaner. The glass should be completely dried with a lint free cloth or paper towel. Do not use abrasive cleaners on glass surface. Do not spray liquids directly onto any surface.

Metal Surface

Dust particles can be removed by buffing lightly with a clean dry cloth. A damp cloth can be used to clean painted surfaces. Do not use abrasive cleaners. Do not spray liquids directly on to any surface,

C. Electrical Wiring Diagram

See Figure 6.1.

D. Servicing

Except for installation and cleaning described in this manual, an authorized service representative should perform any other servicing.

WARNING! Risk of Electrical Shock! Any other servicing needed must be performed by an authorized service representative. Do not attempt to service the unit yourself.
